

EVS vacancy in Denmark

InterCollege is looking for volunteers to join our team in our office in Aalborg! We are hosting short term, as well as long term EVS.

Your task and the learning

As a volunteer with InterCollege, you will get a lot of responsibility. Before the start of the project we will make a plan for your work and your learning. Therefore, not two EVS projects will look alike. Most volunteers at InterCollege are working with the rest of the team on drafting applications for projects, implementing trainings, giving logistical or technical support for different local, national or international trainings.

It is foreseen that the volunteer will actively participate in the project Share2Learn, a local training and networking hub for young people living in Aalborg.

The potential outcome of doing an EVS with us can be different depending on your previous experiences, your interests and your own efforts. Most volunteers, however, get practical experiences with project management and project design. Most volunteers will equally get practical experiences with delivering trainings and doing public speaking.

Finally, InterCollege is, for most persons, an intercultural experience and the beginning of a life with network and friends from all over the world.
